Subject: VI CMS Interim Report
Attachments: CMS_Vapor Report_May 2015_EPA comms_MMv1.docx

Mr. Cormier:

Attached are EPA's comments on the Corrective Measures Study Interim Report-Soil Vapor, dated May 2015. As discussed further in the attached comments on the report, please submit a work plan to conduct additional indoor air and sub-slab vapor sampling for buildings 500, 700, 800, and 703 on a semi-annual basis. The work plan should also include a schedule for at least two more sampling events at historic soil gas monitoring locations that exceeded soil gas screening levels. This is necessary to verify that VOC soil gas concentrations continue to trend downward.
